

Figure S6. (a) Near-infrared (NIR) false color image of Drakes Estero and Estero de Limantour from Sentinel II 10-m resolution imagery on 16 Apr. 2016. **(b)** NIR false color image from Landsat 8 30-m resolution imagery on 15 Apr. 2016. **(c)** Eelgrass density map near the mouth of Creamery Bay assessed in 2005. **(d)** Density map of submerged vegetation using a simple blue band ratio algorithm from Landsat 5 on 17 Apr. 2005. Darker blue areas represent higher proportional cover of submerged vegetation.
